

Where the Conversion Leaks Are

allbirds.com · CRO Recommendations · August 2026

The most valuable conversion mechanism on this site is the product page's Add-to-Cart CTA, which is currently missing on the Anytime Ankle Sock page, directly blocking purchases. This is compounded by a sitewide shipping delay warning ('orders may take up to 30 days to ship') that creates a major objection, and a homepage hero with vague copy and redundant CTAs that fail to guide users toward a clear purchase path.

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
